Game Sheets and Information

Lorien Trust Guild Crafting Lists 2021

This downloadable file contains information about the products, prices, abilities and creating skills required for producing Craftable Items (Lammies and other in-game special items) for the Lorien Trust Game. Details of the skills required to produce these items in-game are listed in the Lorien Trust Handbook, downloadable from www.lorientrust.com/publications.

These lists are published yearly and are updated during the winter season (occasionally errors may be corrected if necessary) to be adjusted with price, power, requirement updates – and occasionally adding new items or deleting unavailable ones. The prices that are listed in each entry are in Gold (in-character money) or fractions of (for example 2.5 Gold would be 2 Gold and 2 Silver – a silver being a quarter of a Gold in value). The prices listed are only fixed as the creation cost for the year and not the actual in-game value of the item (which can vary depending on in-game roleplay). In addition these prices will be the base value used for determining values by characters with the Fence Occupational Skill as well as some in-game trading or selling functions organised by some Guilds. **Any item that is crafted at a Lorien Trust event MUST be created during time-in and MUST be attached immediately to an appropriate physrep (see the Lorien Trust Handbook for more details).** If you do not have an appropriate physrep at the point of creation you will not be allowed to create the item – in addition, during time-in the attached lammie must remain attached to the physrep and may not be detached unless it is being transferred to a new Physrep for Theft/Legitimate Exchange purposes. Retaining lammies in pouches, bags, folders, booklets, wallet or other place (not attached to an appropriate physrep during time-in) is regarded as cheating and any lammies found to be stored in this way will be confiscated and destroyed. **We recommend only printing the files you require for your character to minimise paper waste. Ensure that any used or replaced sheets are disposed of through a recognised recycling system.**

Crafted Items and the Economy

Once an item has been created and attached to a physrep it becomes an in-game item and can be used, sold, traded, stolen and lost. In addition some lammies will have an after-creation value for the intrinsic ingredients and/or materials they contain. Some items will have a 2 year duration and have a part of the lammie that may be hole-punched. These items may be **Disenchanted** (see Lorien Trust Handbook for description) which means that some Black-Market organisations and even some Guilds can accept these items and either destroy the item to recycle the materials or Magic contained in the item – or shave enough of the material to retain the effectiveness of the item but gain a smaller yield of material.

Disenchanted Crafted Items Only two-year Duration Crafted Items can become *Disenchanted*. This can happen naturally over time or the item can be put through a process that will *Disenchant* the item. Items that are not Crafted such as powerful Ritual Items or Iconic Weapons are impossible to *Disenchant* (or in the case of the Black Market Disenchancers – too hot to handle) and will very often be rejected or a token sum offered for its sale.

- A two year item that reaches its second year of existence will automatically become **Disenchanted** (an area on the lammie can be punched when this date is reached). A two year lammie that is still within its first year of existence can be sold on to some Characters who have the ability or facilities to extract any excess power or valuable material (without affecting the powers of the item). These items are often sold at a later date for a discounted price (and the lammie will have been punched in the same way as above).
- An item that has been **Disenchanted** is noticeable in-character (out-of-character an inspection of the punched lammie will show that it has been **Disenchanted**) and will almost certainly be rejected by the characters that can disenchant items.
- An item that has been Disenchanted retains its original abilities, power rating, and expiration date.

Selling an item to be Disenchanted The Armourers are one of the Guilds that have the facilities to Disenchant items and can often give up to half the make value of an item that is eligible to be Disenchanted (although this can be much lower depending on the needs of the Guild). **The item will be retained by the Guild and can not be repurchased after it has been disenchanted.** Other characters can also offer in-character money for items that can be Disenchanted (and are not as fussy about how the item has been acquired) – these character will have the Fence Occupational Skill.

Antidote Lvl	Gold	PR	Name	Description & Notes
Level 1	1 Gold	0	Venom Remedy	Purge All Poison
Level 1	3 Gold	1/1	Venom Prevention	Grants the Occupational Skill Immune to Lethal Alchemical Venoms (all day)
Level 2	25 Gold	0	Magical Venom Remedy	Removes all non-tailored magical venom effects from the target

Distilling Two or more levels of Alchemy to be combined to make a higher level of product (up to Level 3). These can be your own make levels or from several different Alchemists (must all be present). Your used make will be recorded as used as you would for any normal Alchemical creation. May not be used to create a product that requires a Reagent.

Reagents Are catalyst ingredient that can help in the Alchemical process, they are volatile and will spoil quickly therefore can only be used at the point of creation and may not be traded, sold or otherwise swapped.

Items marked with* can only be made once per year as they are exceptional items in both quality and power and consume a Level 4 (Magical) crafting slot for the event.

PR An item with two PR numbers (e.g. 1/2) indicates the PR when in the container (not consumed) and the PR added to the target (Usually a full day/4 day potion).

Spellbind For all of the Crafted items that are noted "(Spellbind)" the crafter/caster must have the ability and cast the spell required using their own spell list(s). Any power, spell list, ability or other way of casting the spell (including other characters casting the spell) will not work for the crafting process.

You may expend a higher level crafting allocation to craft a lower level crafted item if you wish.

2 (Artisan)	8	5	Drakeshield - Immune to Fumble, Shatter & Normal Crush	0	
3 (Master)	22	6	Nagashield - Immune to Fumble, Shatter & Crush	1	

Spell Tempering

Crafting	Gold	PR	Item
Spell Tempering	2	1	Any appropriate** item (weapon, armour, box, amulet etc.)
Master Spell Tempering	6	1	Any appropriate** item (weapon, shield armour, box, amulet etc.)

Items that have Arcane Crafter (X) in the notes indicate that the crafter must be able to craft items of that level to etch the required runes into the weapon - this does not affect the number of items that the same character can produce during an event.

Items that have (Invoke 1/10min) in the description Require invocation to activate the item or part of the items abilities.

Reforge (a process of heating and quenching) Allows more powerful, complex or desirable items to be made. The character may only use these reforge abilities on an item that they are creating themselves and some items may require more than one reforge to create.

Spiterace/Spitepattern Target race chosen on creation – Any Race incl Summonable/Plant/Mineral etc.

Racefury/Patternfury Target patten type chosen on creation – Living, Unliving or Magical Pattern.

Items marked with* can only be made once per year as they are exceptional items in both quality and power and consume a Level 3 (Master) crafting slot for the event.

Appropriate item** Must conform to Lorien Trust standards for decency and safety and be a weapon-checked item in the case of any weapon, shield or armour. Other items such as an amulet, box or other non-combat prop may be Spell Tempered. The Lorien Trust reserve the right to refuse the use (and Spell Tempering) of a physrep if deemed inappropriate, unsafe or otherwise unusable in the game.

Note that unless explicitly mentioned – items are not immune to Fumble/Shatter.

You may expend a higher level crafting allocation to craft a lower level crafted item if you wish.

Items marked with * can only be made once per year and require a level 1 and level 2 crafting slot to create as they are exceptional items in both quality and power. Any item described as a Bow above may also be a Crossbow

A Note on Bows/Crossbows Lammied bows/crossbows plus any attached Bowstring Hexes may be stored in out-of-character areas during time-in only when conditions such as weather, darkness, high winds etc. (as described under the Bow Competency rules and test) prevent the item from being safely used. If the conditions improve to allow the use of the items again, the item should be retrieved from the out-of-character area and returned to the game. Under all other normal game circumstances the item must remain on a physrep and within the game area as per the normal weapon and item guidelines. This will be noted on appropriate lammies.

You may expend a higher level crafting allocation to craft a lower level crafted item if you wish.

Spellbind For all of the Crafted items that are noted "(Spellbind)" the crafter/caster must have the ability and cast the spell required using their own spell list(s). Any power, spell list, ability or other way of casting the spell (including other characters casting the spell) will not work for the crafting process. Items noted as Amulets and Glyphs must conform to all Lorien Trust decency and safety standards for game use. Details of Scroll and Glyph physrep standards can be found in the Lorien Trust Handbook. Scrolls to be used with a Wyrmskin Scrollbook may be bound into/removed from the Scrollbook with a minimum of 10 seconds appropriate roleplay.

Wands Require a larp suitable non-combat prop phys rep no greater than a small weapon in size (18"). A wand may be held in the casting hand when casting its effect (requires concentration), this is an exception to the handbook requirements for having an empty casting hand.

You may expend a higher level crafting allocation to craft a lower level crafted item if you wish.

Crafting Lists Version Numbers and Updates

From time to time this document will be updated, this may include additions or corrections that we hope will improve the game for all. Updates for these sheets will be noted below and the version number for each sheet updated regardless of changes to the individual page. We recommend downloading and familiarising yourself with the latest version and updates regularly and to check for changes before each event. This document can be downloaded from www.lorientrust.com/publications/

V4.01/5 Update to Strikedown/Crush items (description as per Occupational Skill). Update to once per year makes for clarity. P01 clarity text for Guild Disenchanting of an item. Added entry for Spell Tempering (all levels). Wand description updated. Note added to appropriate lists allowing (explicitly) to use a higher level crafting allocation to create a lower level item if you wish. Thaumcraft Glyph now Attune 10min.
